EV CHARGING STATION 158 MAIN STREET (T/M/L 004-002-027)

The Tesla Auto Company, is proposing the installation of an EV (electric vehicle) Charging Station at the Ashland Dunkin Donuts (NCEC, LLC) property at 158 Main Street (T/M/L 004-002-027). It will consist of the installation of a transformer and eight service posts. The units will be installed along one side of the Dunkin Donut parking lot. - Parking spaces are not in the setback
- Is there enough room to install the chargers without encroaching into the setback?
- The Ashland Electric Department must be consulted regarding the placement of electrical connections and the amount of electricity that will be needed for the proposed project.
- Building and electrical permits are required.
- If there is additional signage promoting the charging stations, the sign regulations must be consulted.

- Full Site Plan Review process will be required, with an updated site plan submitted. (A 2003 site plan is available in the land use file for the property.)
- Impact of project on the Summer 2020 construction of the new Main Street sidewalk.
