20 HIGHLAND STREET • P.O. BOX 517 • ASHLAND, NEW HAMPSHIRE 03217-0517  
TOWN OFFICE (603) 968-4432 FAX (603) 968-3776

Dear Homeowner:

## Lead Service Line Inventory

This letter is to notify you of upcoming activities in your drinking water system that we will be performing to comply with the federal Lead and Copper Rule Revisions (LCRR). By October 16<sup>th</sup> of 2024 all public water systems need to prepare and maintain an inventory of service line materials. The goal of this survey is to identify and replace all drinking water service lines comprised of lead and galvanized steel downstream of lead.

Most of our records indicate the service material from the water main to the curbstop. An inventory of the service line material from the curbstop to the house will need to be performed. To limit the disruption to our customers, the department has created an online database where you can do your own inspection and submit data directly to us. By filling out this survey, you will be helping the department meet the LCRR and save a potential appointment to inspect your service line. You can access this by scanning the QR code, following the link or going to the town website at [ashland.nh.org](http://ashland.nh.org). For more detailed information on conducting the in-home assessment please visit the town website or reach out to us at [waterandsewer@ashland.nh.gov](mailto:waterandsewer@ashland.nh.gov).
